**Subject:** Re: Follow-up on Glen Canyon / Lake Powell

Thanks.

I misinterpreted the advisory. Tom will be calling you.

I spoke with Jared Blumenfeld on Monday and then with you later that afternoon. I contacted Brent Maier yesterday and was referred to Rusty Harris-Bishop. I emailed Rusty yesterday and will forward that message and the response to you.

Who at EPA did you talk to?

Hi Robert,  
Glen Canyon has not closed the San Juan Arm of Lake Powell, although last Friday an advisory was sent out to alert park visitors of potential risks. We will be updating our information again based on the information provided by the Utah Department of Health recommending that people not drink water from the San Juan River and that they rinse off after contact.

We have been requesting assistance from EPA regarding how to respond to visitor and media inquiries regarding any health risks at Glen Canyon and would welcome any updates or clarifying information. Tom, I look forward to meeting with you. Robert, I will be in contact regarding any broader policy issues that relate to Glen Canyon.

Thanks again!

Our OSC Tom Dunkleman is on the way to Page. I sent your contact info.

He will be contacting you. I am now the Deputy Area Commander so if you have any big picture items or policy issues please call me. Also who made the decision to close the San Juan Arm? We could have helped you with that.

Hi Robert, I'm sorry I missed your phone call this morning. Mark Anderson is our aquatic ecologist at Glen Canyon National Recreation Area and is our primary point of contact for water sampling efforts. Mark, Robert is asking for input on where to conduct sampling on Lake Powell in response to the Gold King Mine Release.

Please let me know if you two are unable to connect and if there is anything I can do to assist. Thanks!
